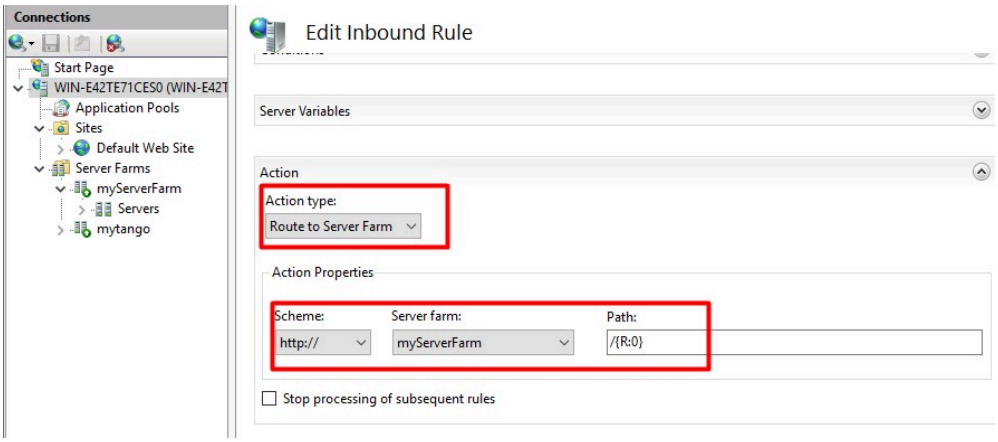
Hi,

In need to ask, How to add re-write global rule with action type "Redirect to Server Farm" in powershell?

Question activity

Sign in to follow questions and users



I am using below command:

.\appcmd.exe set config -section:system.webServer/rewrite/globalRules /+"
[name='myServerFarmRule',patternSyntax='Wildcard',stopProcessing='True'].action.type:"Reoute to Server Farm"" /+"
[name='myServerFarmRule',patternSyntax='Wildcard',stopProcessing='True'].action.url:"myServerFarm/{R:0}"" /+"
[name='myServerFarmRule',patternSyntax='Wildcard',stopProcessing='True'].action.logRewrittenUrl:"True"" /commit:apphost

but always giving me error as below:
Failed to process input: The parameter 'Server' must begin with a / or - (HRESULT=80070057).

Can anyone please let me know if I am doing correct or need any modification in the command, I need to "Redirect to Server Farm" in the action properties of the farm as depicted in the attached screenshot.

Regards
Abid Zafar

Hi @Abid Zafar ,

You can try this rule:

```
appcmd.exe set config  -section:system.webServer/rewr
appcmd.exe set config  -section:system.webServer/rewr
appcmd.exe set config  -section:system.webServer/rewr
```

Or combine them to a command line:

```
appcmd.exe set config  -section:system.webServer/rewr
```

I have tested them and they can work well.

Route is misspelled and you have double quotes around some values where you should use single quotes. Try this.

```
.\appcmd.exe set config -section:system.webServer/re
```

Note, I did not test this.
