TARLOGIC
CYBERSECURITY EXPERTS

Cybersecurity experts

The digital universe is full of threats.

As cybersecurity experts we are here to protect your company from all kinds of cyber attacks. We analyze vulnerable points and protect you against any current or future threats.

Contact us now

Website Security Audit

Verifying the security of web applications through a comprehensive audit can help protect the company from the risks and costs associated with security breaches.

Mobile app security Audit

We assess your mobile apps' security and provide remediation guidance, ensuring your data stays safe and protected.

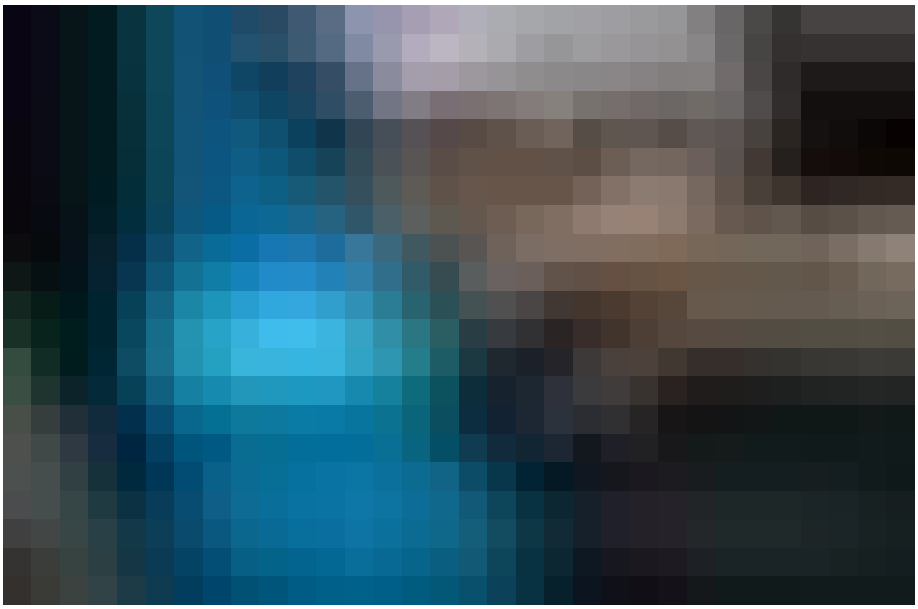
Cyber intelligence

Discovering threats while supporting your business

Custom threat intelligence methodology, aligned with Tiber-EU, NIS2, and DORA standards to provide high-quality information to your business strategy. Fraud prevention with pioneering solutions against phishing and digital piracy.

Cyber intelligence services



Threat Hunting - MDR Services

A tailored solution for each company

Threat Hunting, also known as Managed Detection and Response (MDR) service, is a proactive security service. Our team of experts continuously and in real-time tracks threats to your systems, identifying suspicious activities even when no alerts are triggered. We detect and contain threats before it's too late.
