If you want to compile/interpret your code on a target but using **#csc** (c#), **#vbc** (vb .net), **#cscript**, **#wscript**, **#jjs** ... is too risky/unavail (e.g, **#JRE** is missing), then consider to compile your **#JScript** (**#net** bin) with **#jsc** compiler (part of .net framework). **#lolbin**?
