IIS shortcode Scanner

Under certain circumstances, windows 8.3 short names may be bruteforce enumerated under IIS with .net enabled,

request these two urls:

- http://www.target.com/~1****/a.aspx
- http://www.target.com/l1j1e*~1****/a.aspx

If the first one return HTTP 404 and the second one return no 404. Your server might be exploitable to this vulnerability.

Change Log (Oct 27, 2016)

- Bug fixed: extention short than 4 letters like `/webdeb~1.cs` now could be enumerated
- Code reconstruction

Usage

```
iis_shortcode_Scan.py target
```

from <http://www.lijiejie.com> my[at]lijiejie.com
