# Changing the location of the Windows Event logs

2017/12/19

Posted in [command line](#), [Microsoft](#), [Windows](#)

By default the Windows Event logs are stored in  
C:\Windows\System32\winevt\Logs

If you want to change them to a different location you’ll create a  
new folder (e.g. D:\windowslog) and then execute the wevtutil  
command in a command prompt with administrative rights.

Example to change the application log:  
wevtutil sl application /lfn:”D:\windowslog\Application.evtx”

wevtutil at MS Technet
