

Megatools - command line client for Mega.nz

Megatools is a collection of programs for accessing Mega.nz service from a command line of your desktop or server.

Megatools allow you to copy individual files as well as entire directory trees to and from the cloud. You can also perform streaming downloads for example to preview videos and audio files, without needing to download the entire file.

You can register account using a 'megareg' tool, with the benefit of having true control of your encryption keys.

Megatools are robust and optimized for fast operation - as fast as Mega servers allow. Memory requirements and CPU utilization are kept at minimum.

Megatools are reasonably simple and cleanly written. You can skim the entire code in an afternoon and see what it does. You can be completely in control of the update process for megatools. Pace of development is slow and changes are easy to review. This is all important if you value your security, as shown by issues with browser based solutions ([mega.nz browser extension hacked](#)). Megatools was written to avoid such issues.

Mega website can be found at [mega.nz](#).

Support the project

Megatools is Free and opesource software. It is an independent personal project not backed by any comapny or commercial interests. If you benefit from megatools or would like to see it improve and grow, you can contribute by writing code.

News

Keep yourself in the loop about new releases and features via [RSS](#).

See the [NEWS file](#) for detailed description of changes.

2024-10-28

Megatools 1.11.1 static builds rebuilt with latest dependencies. Windows and some AVs misdetect previous build as containing malware. If in doubt read CHECKSUMS.TXT.

2023-02-12

Megatools 1.11.1 released with some bugfixes.

2022-09-19

Megatools 1.11.x experimental build released with some bugfixes.

2022-05-19

Megatools 1.11.0 released with new features and bugfixes.

2022-04-01

New megatools experimental builds are available, with updated dependencies fixing security issues.

2021-10-29

New megatools experimental builds are available, with updated dependencies and TLS session cache disabled [fixed].

2021-05-05

New megatools experimental builds are available, with updated dependencies and some fixes.

2020-08-30

New megatools experimental builds are available, with updated dependencies.

2020-05-03

New megatools experimental builds are available, with contributed support for new login flow.

2020-05-01

New megatools experimental builds are available, with a minor fix.

2020-04-04

New megatools experimental builds are available, with updated dependencies and support for new mega.nz links format.

2019-11-07

New megatools experimental builds are available, with updated dependencies.

2019-06-08

New megatools experimental builds are available, with some bugfixes.

2019-04-13

Megatools moved off github.

2019-03-24

New megatools experimental builds are available, added support for IPv6 and source IP address/network interface selection.

2019-03-05

New megatools experimental builds are available, added test and export tools.

2019-02-26

New megatools experimental builds for macOS, contributed by a user.

2019-01-07

New megatools experimental builds are available.

2018-11-26

New megatools experimental builds are available.

2018-10-31

Megatools 1.11.x has experimental builds now include a few new architectures: MIPS little-endian, i686, and a special build with Windows XP support.

2018-10-04

Download

Static builds for Windows and various Linux architectures are provided in the [builds](#) directory.

You can download the latest versioned release of the source code here:

- [megatools-1.11.1.20241028.tar.gz](#) (103 kB)
- [megatools-1.11.1.20241028.tar.gz.asc](#)
- For older versions see [Archive](#)

You can also use [Chocolatey](#) to install megatools on Windows thanks to [ERap320](#).

Installation

To install megatools on Arch Linux you can use the package [megatools](#) from the official repositories.

Thanks to Alberto Garcia, megatools was [accepted into debian unstable](#), so you can use apt-get to install it easily.

Bugs and support

Please report bugs via email:

- megatools@megous.com
