SafetyKatz

SafetyKatz is a combination of slightly modified version of [@gentilkiwi's Mimikatz](#) project and [@subtee's .NET PE Loader](#).

First, the [MiniDumpWriteDump](#) Win32 API call is used to create a minidump of LSASS to C:\Windows\Temp\debug.bin. Then @subtee's PELoader is used to load a customized version of Mimikatz that runs **sekurlsa::logonpasswords** and **sekurlsa::ekeys** on the minidump file, removing the file after execution is complete.

About

SafetyKatz is a combination of slightly modified version of [@gentilkiwi's Mimikatz](#) project and [@subTee's .NET PE Loader](#)

Modifications

- @subtee's PE Loader was slightly modified so some of the pointer arithmetic worked better on .NET 3.5
- @gentilkiwi's Mimikatz project was modified to strip some functionality for size reasons, and to automatically run the sekurlsa::minidump mode (deleting the minidump file after). If you don't trust my compiled version, feel free to build it yourself :)

[@harmj0y](#) is the primary author of this port.

SafetyKatz is licensed under the BSD 3-Clause license.

Usage

```
C:\Temp>SafetyKatz.exe
```

```
[*] Dumping lsass (808) to C:\WINDOWS\Temp\debug.bin
[+] Dump successful!
```

```
[*] Executing loaded Mimikatz PE
```

```

Compile Instructions

We are not planning on releasing binaries for SafetyKatz, so you will have to compile yourself :)

SafetyKatz has been built against .NET 3.5 and is compatible with [Visual Studio 2015 Community Edition](#). Simply open up the project .sln, choose "release", and build.
