SoftPerfect Network Scanner

Powerful multipurpose network administration tool for Windows, macOS and Linux

This fast, highly configurable IPv4/IPv6 scanner can streamline many of your network support procedures. Its well-designed interface, light weight and portability coupled with an extensive range of options and advanced features make **SoftPerfect Network**

Scanner an invaluable tool, whether you are a professional system administrator, someone providing occasional network maintenance, or a general user interested in computer security.

SoftPerfect Network Scanner can ping computers, scan ports, discover shared folders and retrieve practically any information about network devices via WMI, SNMP, HTTP, SSH and PowerShell. It also scans for remote services, registry, files and performance counters; offers flexible filtering and display options and exports NetScan results to a variety of formats from XML to JSON.

Key features

- Fully supports both IPv4 and IPv6 discovery.
- Performs a ping sweep and displays live devices.
- Detects hardware MAC-addresses, even across routers.
- Discovers writable and hidden shared folders.

Product Info & Download

Latest version

8.2.2 (4 July 2024)
[Changelog](#)

Supported platforms

Windows 7 through
Windows 11,
Windows Server 2008 R2
through 2022,
macOS 11 through 15+,
Linux

Some features differ between
the Windows, macOS and Linux
versions
