Concur, also seeing the MSDT answer file be able to bypass the current Mesdetty Defender detection, avoiding the command-line arguments. And that can totally load from a network share

 **Daniel (ダニエル)** @ImpetuousDanny · May 31, 2022

It seems Windows Defender detects on the IT_RebrowseForFile and IT_BrowseForFile parameters when msdt.exe executes. However if you use an answer file with msdt.exe it doesn't detect and executes the same. Anyone know a way to launch an answer file from a remote location?? 😊
