

# Scanner

How to scan workstations quickly

[Home](#) » [Documentation](#) » Scanner

Checking workstations for local admin privileges, open shares, startup time is usually complex and requires an admin. PingCastle’s scanner bypass these classic limits.

## Prerequisites

## Build it

The report can be generated in the interactive mode by choosing “scanner” or just by pressing **Enter**. Then the list of available scanner is displayed.

As an alternative, the scanner can be run using the command:
