You can now use ngrok without even installing ngrok 🤖

### ngrok without ngrok

While we want ngrok everywhere, there are embedded devices and environments that the ngrok agent doesn't run in (yet!). SSH reverse tunneling is an alternative mechanism to start an ngrok tunnel without needing to download or run the ngrok agent. You can start tunnels via SSH without downloading an ngrok agent by running an SSH reverse tunnel command.

Just start ngrok:

```
# equivalent: `ngrok http 80`  
  
ssh -R 80:localhost:80 tunnel.us.ngrok.com http
```

And even add middleware:

```
# equivalent: `ngrok http --hostname=example.com --oauth "google"  
8080`  
  
ssh -R example.com:80:localhost:8080 tunnel.us.ngrok.com http -  
oauth="google"
```
