@nas_bench

In the background, this is basically using "cdb.exe" with a debugging script. LOLBAS doesn't seem to have this one documented for cdb ([lolbas-project.github.io/lolbas/OtherMS...](https://t.co/YMVpgU72Dq)) so here it is.

cdb.exe -c \$<"[PathToDebuggingScript]" [Command]

The media could not be played.

We know from LOLBAS that adplus can be used to dump lsass ([lolbas-project.github.io/lolbas/OtherMS...](https://t.co/YMVpgU72Dq)). But you can also use it to run arbitrary commands and binaries with the "-sc" flag. #lolbin #lolbas

adplus.exe -crash -o [OutputDir] -sc [Command]

The media could not be played.
