Disabling OAuth app access restrictions for your organization

Organization owners can disable restrictions on the OAuth apps that have access to the organization's resources.

Warning: When you disable OAuth app access restrictions for your organization, any organization member will automatically authorize OAuth app access to the organization's private resources when they approve an application for use in their personal account settings.

- 1 In the upper-right corner of GitHub, select your profile photo, then click  **Your organizations**.
- 2 Next to the organization, click **Settings**.
- 3 In the "Third-party Access" section of the sidebar, click  **OAuth application policy**.
- 4 Click **Remove restrictions**.
- 5 After you review the information about disabling third-party application restrictions, click **Yes, remove application restrictions**.
