▶ This is the open source repository of NetExec maintained by a community of passionate people

NetExec - The Network Execution Tool

This project was initially created in 2015 by @byt3bl33d3r, known as CrackMapExec. In 2019 @mpgn_x64 started maintaining the project for the next 4 years, adding a lot of great tools and features. In September 2023 he retired from maintaining the project.

Along with many other contributors, we (NeffIsBack, Marshall-Hallenbeck, and zblurx) developed new features, bug fixes, and helped maintain the original project CrackMapExec. During this time, with both a private and public repository, community contributions were not easily merged into the project. The 6-8 month discrepancy between the code bases caused many development issues and heavily reduced community-driven development. With the end of mpgn's maintainer role, we (the remaining most active contributors) decided to maintain the project together as a fully free and open source project under the new name **NetExec** 🚀 Going forward, our intent is to maintain a community-driven and maintained project with regular updates for everyone to use.

You are on the **latest up-to-date** repository of the project NetExec (nxc) ! 🎉

Documentation, Tutorials, Examples

See the project's [wiki](#) (in development) for documentation and usage examples

Installation

Please see the installation instructions on the [wiki](#) (in development)

Linux

```
sudo apt install pipx git  
pipx ensurepath  
pipx install git+https://github.com/Pennyw0rth/I
```

Availability on Unix distributions

Packaging status	
AUR	1.3.0
BlackArch	v1.3.0.r25...
Gentoo overlay Pentoo	1.3.0
Kali Linux Rolling	1.3.0
nixpkgs stable 24.05	1.1.0-unst...
nixpkgs unstable	1.1.0-unst...
Parrot	1.2.0

Development

Development guidelines and recommendations in development

Acknowledgments

All the hard work and development over the years from everyone in the CrackMapExec project
