2.3.1 NTSTATUS Values

Article • 11/16/2021

Feedback

By combining the NTSTATUS into a single 32-bit numbering space, the following NTSTATUS values are defined. Most values also have a defined default message that can be used to map the value to a human-readable text message. When this is done, the NTSTATUS value is also known as a message identifier.

This document provides the common usage details of the NTSTATUS values; individual protocol specifications provide expanded or modified definitions when needed.

In the following descriptions, a percentage sign that is followed by one or more alphanumeric characters (for example, "%1" or "%hs") indicates a variable that is replaced by text at the time the value is returned.

Expand table

Return value/code	Description
0x00000000 STATUS_SUCCESS	The operation completed successfully.
0x00000000 STATUS_WAIT_0	The caller specified the dispatcher object to be signaled when the operation completes.
0x00000001 STATUS_WAIT_1	The caller specified the dispatcher object to be signaled when the operation completes.
0x00000002 STATUS_WAIT_2	The caller specified the dispatcher object to be signaled when the operation completes.
0x00000003 STATUS_WAIT_3	The caller specified the dispatcher object to be signaled when the operation completes.
0x0000003F STATUS_WAIT_63	The caller specified the dispatcher object to be signaled when the operation completes.
0x00000080 STATUS_ABANDONED	The caller attempted to create a dispatcher object that was not signaled, but the operation was abandoned.
0x00000080 STATUS_ABANDONED_WAIT_0	The caller attempted to create a dispatcher object that was not signaled, but the operation was abandoned.
0x000000BF STATUS_ABANDONED_WAIT_63	The caller attempted to create a dispatcher object that was not signaled, but the operation was abandoned.

0x0000010D STATUS_NO_QUOTAS_FOR_ACCOUNT	{No Quotas} No set for this acc
0x0000010E STATUS_PRIMARY_TRANSPORT_CONNECT_FAILED	{Connect Failur was made to cc the primary tra computer WAS transport.
0x00000110 STATUS_PAGE_FAULT_TRANSITION	The page fault '
0x00000111 STATUS_PAGE_FAULT_DEMAND_ZERO	The page fault '
0x00000112 STATUS_PAGE_FAULT_COPY_ON_WRITE	The page fault '

0x00000113 STATUS_PAGE_FAULT_GUARD_PAGE	The page fault 'guard' page.
0x00000114 STATUS_PAGE_FAULT_PAGING_FILE	The page fault occurred in secondary storage.
0x00000115 STATUS_CACHE_PAGE_LOCKED	The cached page is locked.
0x00000116 STATUS_CRASH_DUMP	The crash dump is being created.
0x00000117 STATUS_BUFFER_ALL_ZEROS	The specified buffer is all zeros.
0x00000118 STATUS_REPARSE_OBJECT	A reparse should be performed by the File Manager because of a symbolic link.
0x00000119 STATUS_RESOURCE_REQUIREMENTS_CHANGED	The device has changed its resource requirements.
0x00000120 STATUS_TRANSLATION_COMPLETE	The translator has finished global space and performed the translation.
0x00000121 STATUS_DS_MEMBERSHIP_EVALUATED_LOCALLY	The directory service evaluated locally, because the client is not a catalog server.
0x00000122 STATUS_NOTHING_TO_TERMINATE	A process being terminated has nothing to terminate.
0x00000123 STATUS_PROCESS_NOT_IN_JOB	The specified process is not in the job.
0x00000124 STATUS_PROCESS_IN_JOB	The specified process is in the job.
0x00000125 STATUS_VOLSnap_HIBERNATE_READY	{Volume Shadow Copy Service} ready for hibernation.
0x00000126 STATUS_FSFILTER_OP_COMPLETED_SUCCESSFULLY	A file system or filter driver completed an FIO operation.
0x00000127 STATUS_INTERRUPT_VECTOR_ALREADY_CONNECTED	The specified interrupt vector is already connected.
0x00000128 STATUS_INTERRUPT_STILL_CONNECTED	The specified interrupt vector is still connected.
0x00000129 STATUS_PROCESS_CLONED	The current process is a clone.
0x0000012A STATUS_FILE_LOCKED_WITH_ONLY_READERS	The file was locked with only readers.
0x0000012B STATUS_FILE_LOCKED_WITH_WRITERS	The file was locked with writers.

0x00000202 STATUS_RESOURCEMANAGER_READ_ONLY	The specified Resource Manager updates to the system.
0x00000367 STATUS_WAIT_FOR_OPLOCK	An operation is pending for an open file to obtain an oplock.
0x00010001 DBG_EXCEPTION_HANDLED	Debugger handled the exception.
0x00010002 DBG_CONTINUE	The debugger continues execution.
0x001C0001 STATUS_FLT_IO_COMPLETE	The IO was completed successfully.
0xC0000467 STATUS_FILE_NOT_AVAILABLE	The file is temporarily unavailable.
0xC0000480 STATUS_SHARE_UNAVAILABLE	The share is temporarily unavailable.
0xC0000721 STATUS_CALLBACK_RETURNED_THREAD_AFFINITY	A threadpool worker returned thread affinity information that is not supported. This is unexpected behavior. The process should be restoring the thread affinity.
0x40000000 STATUS_OBJECT_NAME_EXISTS	{Object Exists} / The object exists but the caller does not have permission to access it.
0x40000001 STATUS_THREAD_WAS_SUSPENDED	{Thread Suspended} / The thread was suspended while the thread was in a critical section and termination was requested.
0x40000002 STATUS_WORKING_SET_LIMIT_RANGE	{Working Set Range} / The process failed to set the working set limit range that are outside the system's physical memory.
0x40000003 STATUS_IMAGE_NOT_AT_BASE	{Image Relocation} / The image was not loaded at the address specified in the image header. Fixes must be provided.
0x40000004 STATUS_RXACT_STATE_CREATED	This information is used to track the specified registry values that exist and had to be created.
0x40000005 STATUS_SEGMENT_NOTIFICATION	{Segment Load Notification} / The system is loading, unloading, or moving a program segment. A debugger should attach to the process that a debugger is attached to and breakpoint is set.
0x40000006 STATUS_LOCAL_USER_SESSION_KEY	{Local Session Key} / The system is requesting a local remote session key. The session key is not unique to the session.
0x40000007 STATUS_BAD_CURRENT_DIRECTORY	{Invalid Current Directory} / The current directory is invalid. The process should return to the startup routine to update the current directory.
0x40000008 STATUS_SERIAL_MORE_WRITES	{Serial IOCTL Complete} / The serial IOCTL operation is completed by a serial device. The IOCTL_SERIAL_MORE_WRITES flag is set.

0x40000009 STATUS_REGISTRY_RECOVERED	{Registry Recov system registry log or alternate
