Documentation

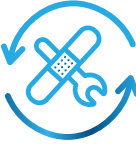

Getting Started
Learn how Action1 works, find information about licensing, system requirements and configurations.

Endpoints
Discover and add endpoints to your Action1 dashboard.

Vulnerability Management
Detect CVEs and remediate vulnerabilities across your organizations.

Patch Management
Identify missing OS updates and manage patch deployment processes and schedules.

Software Deployment & IT Assets
Deploy apps and updates remotely from the Software Repository and enrich the repository by uploading custom packages.

Automation
Automate and optimize remote endpoint management: create automations to run CMD and PS scripts, deploy apps, and reboot endpoints.

Remote Desktop

Assist remote employees and support endpoints with the native Remote Desktop feature.

Real-Time Reports & Alerts

Schedule security screening with custom data sources, automate reports and alert delivery.

Account Access & Management

Learn how enterprises and MSPs can utilize the multi-tenancy feature and grant permissions to users. Invite users and manage login options.

SSO Authentication

To provide easy and secure access to Action1 console, Action1 enables users to log in using single sign-on (SSO) instead of maintaining Action1-specific user credentials.

Security Concerns

Learn about data encryption and app security, our servers, security regulations, and compliance.

Troubleshooting

Learn about the most common issues and get instructions on how to resolve them.

Frequently Asked Questions

Get answers to the most popular questions: security concerns, bandwidth and system requirements. Information on our development, pricing, and licensing structure.

API Documentation

Get started with our REST API, learn how to make your first calls to Action1 API.

Still Have Questions?
