Foxit PDF Reader exportXFADData Exposed Dangerous Method Remote Code Execution Vulnerability (CVE-2023-27363).

This is a proof of concept for [CVE-2023-27363](#) which was discovered by [Andrea Micalizzi aka rgod](#). My POC is deeply based in the previous work made by [Sebastian Apelt aka bitshifter123](#) and publicly available in [this repository](#).

You can download a vulnerable copy of Foxit PDF Reader for testing [right here](#).

Enjoy!
