

List all installed programs, version & path [Windows]

TUTORIALS By Sarcastic Writer · October 8, 2017 · Comments off

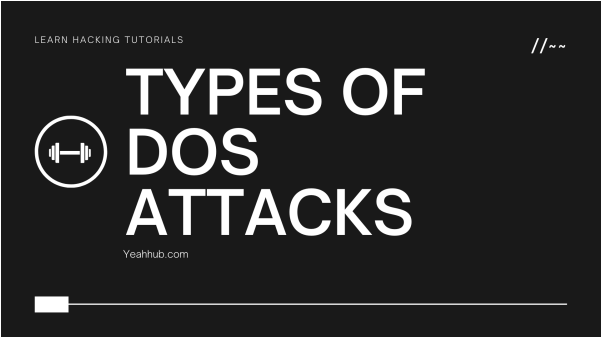

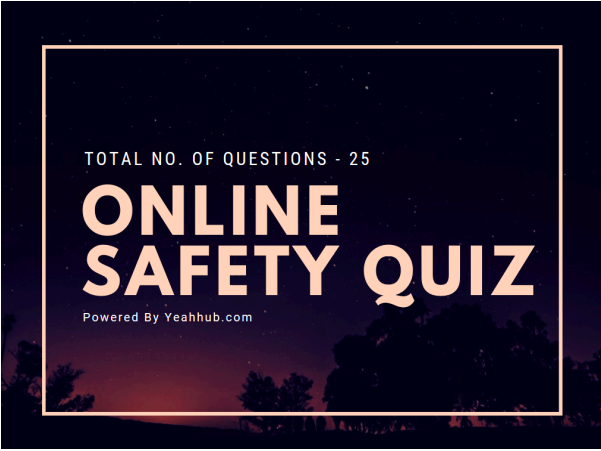

WMIC is the console version of Windows Managament Instrumentation which is available from windows 2000 onwards.

By Typing “**wmic product get name**” will shows you a list of all application names which is installed on your machine.

Search ...

Search

```
cmd Select C:\WINDOWS\system32\cmd.exe

C:\Users\cheta>wmic product get Name
Name

And to save all results in a HTML file (Tabular format), then the command is “**wmic /output:software.htm product get Name, Version /format:htable**”

Use “**wmic product get /?**” to see the parameters including the output formatting with all other attributes.

But sometimes WMIC won’t work on server unless you have explicitly installed “*Management & Monitoring Tools*” in the Add/Remove Windows Component Menu

So for this case, you can find all the information through Registry, by typing “**regedit**” in your Run Command and navigate to below path.

“*HKEY_LOCAL_MACHINE\SOFTWARE\Microsoft\Windows\CurrentVersion\Uninstall*”

If you want to know particular installed software from a particular vendor like Microsoft then you can type “**wmic product where “Vendor like ‘%Microsoft%’” get Name, Version**”
