Nice #LOLBIN from Intune -> AgentExecutor. Does what the name says :D

```
if (args != null && args.Length > 8 && args[0] == "-powershell")
{
    List<string> list = new List<string>();
    try
    {
        ExecutorLog.TraceInformation("Powershell option gets invoked");
        if (string.IsNullOrEmpty(args[1]) || string.IsNullOrEmpty(args[2]) || string.IsNullOrEmpty(args[3]))
        {
            ExecutorLog.TraceInformation("empty or null parameter detected, exit ...");
            return;
        }
        string text = args[1];
        string text2 = args[2];
        string text3 = args[3];
        string text4 = args[4];
        int timeoutSeconds = string.IsNullOrEmpty(args[5]) ? 60000 : int.Parse(args[5]);
        string powershellPath = args[6];
        string enforceSignatureCheck = args[7];
        bool runAs32BitOn = !(args[8] == "1");
        ExecutorLog.TraceInformation(text);
        ExecutorLog.TraceInformation(text2);
        ExecutorLog.TraceInformation(text3);
        ExecutorLog.TraceInformation(text4);
        PowershellExecutor.Run2(powershellPath, text, text2, text3, text4, string.Empty, timeoutSeconds,
            enforceSignatureCheck, false, null, runAs32BitOn, false);
        ExecutorLog.TraceInformation("Agent executor completed.");
        return;
    }
}
```
