

show startup-config

To display the contents ofNVRAM (if present and valid) or to show the configuration file pointed to by the CONFIG_FILE environment variable, use the **show startup-config** EXEC command.

show startup-config

Syntax Description

This command has no arguments or keywords.

Command Mode

EXEC

Usage Guidelines

NVRAM stores the configuration information on the network server in text form as configuration commands. For all platforms except the Cisco 7000 family, the **show startup-config** command shows the version number of the software used when you last executed the **copy running-config startup-config** command.

For the Cisco 7000 family, the **show startup-config** command shows the configuration file specified by the CONFIG_FILE environment variable. The Cisco IOS software informs you whether the displayed configuration is a complete configuration or a distilled version. A distilled configuration is one that does not contain access lists. If the CONFIG_FILE environment variable does not exist or is not valid, the software displays the NVRAM configuration (if it is a valid, complete configuration).

Sample Displays

The following sample output from the **show startup-config** command displays the contents ofNVRAM:

```
Router# show startup-config
Using 5057 out of 32768 bytes
!
version 10.3
!
enable-password xxxx
service pad
!
boot system dross-system 172.16.13.111
boot system dross-system 172.16.1.111
!
exception dump 172.16.13.111
!
no ip ipname-lookup
!
decnet routing 13.1
decnet node-type area
decnet max-address 1023
!
interface Ethernet 0
ip address 172.16.1.1 255.255.255.0
ip helper-address 172.30.1.0
ip accounting
ip gdp
decnet cost 3
!
ip domain-name CISCO.COM
ip name-server 255.255.255.255
!
end
```

The following is partial sample output from the **show startup-config** command when the configuration file has been compressed:

```
Router# show startup-config
Using 21542 out of 65536 bytes, uncompressed size = 142085 bytes
!
version 9.22
service compress-config
!
hostname rose
!
boot system flash gs7-k.sthormod_clean
boot system rom
```
