# py2exe

py2exe is a [Python](#) [Distutils](#) extension which converts Python scripts into executable Windows programs, able to run without requiring a Python installation.

Development is hosted on [GitHub](#). You can find the [mailing list](#), [svn](#), and [downloads for Python 2](#) there. [Downloads for Python 3](#) are on PyPI.

py2exe was originally developed by Thomas Heller who still makes contributions. Jimmy Retzlaff, Mark Hammond, and Alberto Sottile have also made contributions. Code contributions are always welcome from the community and many people provide invaluable help on the mailing list and the Wiki.

py2exe is used by [BitTorrent](#), [SpamBayes](#), and thousands more - py2exe averages over 5,000 downloads per month.

In an effort to limit Wiki spam, this front page is not editable. Feel free to edit other pages with content relevant to py2exe. You will need an account to edit (but not to read) and your account information will be used only for the purposes of administering this Wiki.

The old [py2exe](#) web site is still available until that information has found its way into this wiki.

## Starting Points

- [Download py2exe for Python 2 from SourceForge](#)
- [Download py2exe for Python 3 from PyPI](#)
- [News](#): information about the most recent releases
- [Tutorial](#): the basics of creating a Windows executable
- [FAQ](#): What does py2exe actually do and what are all those files?
- [GeneralTipsAndTricks](#): general tips for working with special situations
- [WorkingWithVariousPackagesAndModules](#): many just work, others need more handling
- [ProblemsToBeFixed](#)
- [TroubleshootingImportErrors](#)
- [ReleaseProcess](#)
- [NonEnglish](#): read about py2exe in other languages
- [Get help on the mailing list](#)
-  [#py2exe](#) IRC channel at Freenode.net

## How to use this site

A Wiki is a collaborative site, anyone can contribute and share:

- Edit any page by pressing **Edit** at the top or the bottom of the page
- Create a link to another page with joined capitalized words (like [WikiSandBox](#)) or with `[[words in brackets]]`
- Search for page titles or text within pages using the search box at the top of any page
- See [HelpForBeginners](#) to get you going, [HelpContents](#) for all help pages.

To learn more about what a [WikiWikiWeb](#) is, read about  [WhyWikiWorks](#) and the  [WikiNature](#).

This wiki is powered by [MoinMoin](#).
