       .DESCRIPTION
34
35
       Out-ObfuscatedStringCommand orchestrates the application of all string-based obfuscation functions
       The available ObfuscationLevel/function mappings are:
36
       1 --> Out-StringDelimitedAndConcatenated
37
38
       2 --> Out-StringDelimitedConcatenatedAndReordered
       3 --> Out-StringReversed
39
40
       .PARAMETER ScriptBlock
41
42
43
       Specifies a scriptblock containing your payload.
44
45
       .PARAMETER Path
46
       Specifies the path to your payload.
47
48
49
       .PARAMETER ObfuscationLevel
50
       (Optional) Specifies the obfuscation level for the given input PowerShell payload. If not defined \mathfrak{t}
51
       The available ObfuscationLevel/function mappings are:
