## **b**pftrace

High-level tracing language for Linux systems

**Documentation** 

Tutorial

Community forum

Bug tracker

**IRC** 

Github

## Example

Produce a histogram of time (in nanoseconds) spent in read(2):

```
// read.bt file
tracepoint:syscalls:sys_enter_read
 @start[tid] = nsecs;
}
tracepoint:syscalls:sys_exit_read / @start[tid] /
 @times = hist(nsecs - @start[tid]);
 delete(@start[tid]);
}
# bpftrace read.bt
Attaching 2 probes...
^C
@times:
