Announcing expanded CIEM support to reduce multicloud risk in Security Command Center

Sep 2024

Identities can be a major source of cloud risk when they're not properly managed. Compromised

### Activating your defender's advantage at mWISE '24

Sep 2024

To stay ahead of evolving threats, security leaders and practitioners must tap into a vital but underutilized tool to strengthen their defenses: collaboration.

Cloud CISO Perspectives: The high value of cross-industry communication

Sep 2024

Welcome to the first Cloud CISO Perspectives for September 2024. Today I'm taking a look at how our initiatives to drive cybersecurity collaboration across
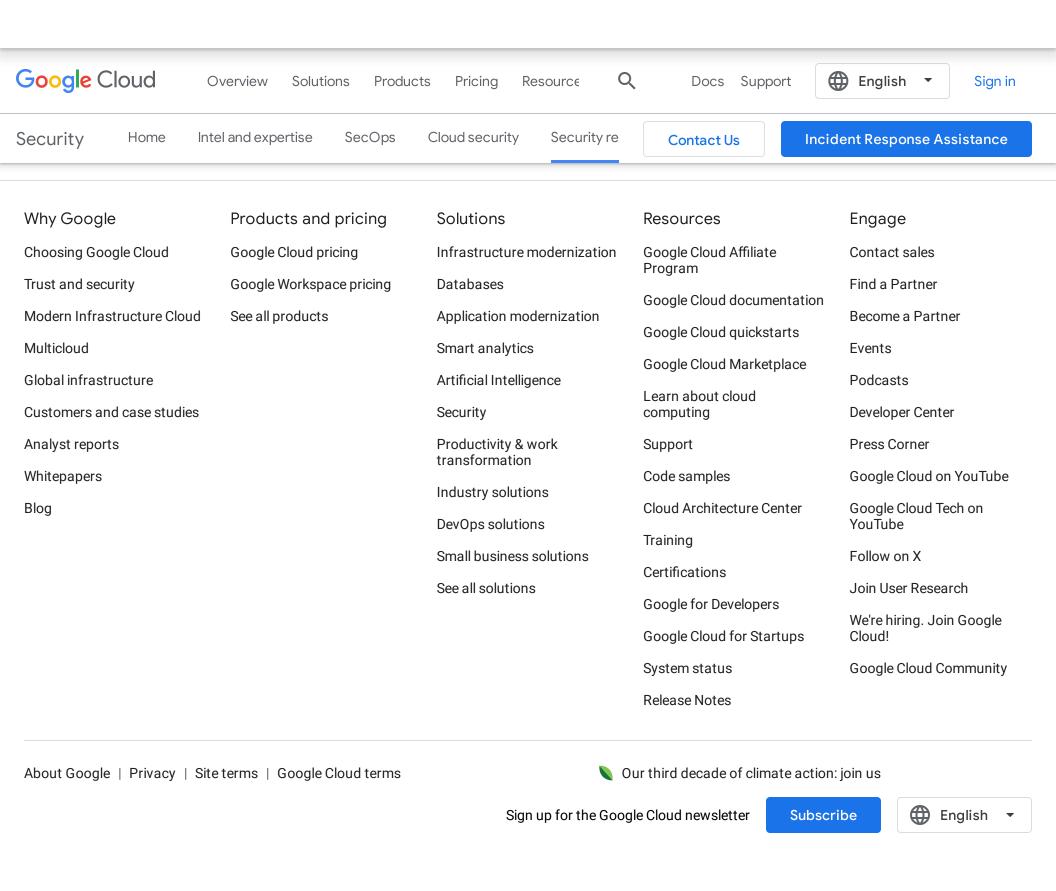

Protecting Multi-Cloud Resources in the Era of Modern Cloud-Based Cyberattacks

Sep 2024

In the era of multi-cloud adoption, where organizations leverage diverse cloud platforms to optimize their operations, a new wave of security challenges have emerged.

Safer by default: Automate access control with Sensitive Data Protection and conditional IAM

Sep 2024

The first step towards protecting sensitive data begins with knowing where it exists. Continuous data monitoring can help you stay one step ahead of data security risks and set proper access controls to ensure data is used for the right reasons while minimizing unnecessary friction.

Evolution of Ransomware and Data Theft Extortion: Expert Insights and Defense Strategies

Sep 2024

Today, it's more imperative than ever to stay one step ahead of the threat by understanding the most common tactics, techniques, and procedures (TTPs).
