T1518.001 - Security Software Discovery

Description from ATT&CK

> Adversaries may attempt to get a listing of security software, configurations, defensive
> tools, and sensors that are installed on a system or in a cloud environment. This may
> include things such as firewall rules and anti-virus. Adversaries may use the
> information from [Security Software Discovery]
> (https://attack.mitre.org/techniques/T1518/001) during automated discovery to shape
> follow-on behaviors, including whether or not the adversary fully infects the target
> and/or attempts specific actions.
> Example commands that can be used to obtain security software information are netsh,
> `reg query` with Reg, `dir` with cmd, and Tasklist, but other indicators of discovery
> behavior may be more specific to the type of software or security system the adversary
> is looking for. It is becoming more common to see macOS malware perform checks for
> LittleSnitch and KnockKnock software.
>
> Adversaries may also utilize cloud APIs to discover the configurations of firewall rules
> within an environment.(Citation: Expel IO Evil in AWS) For example, the permitted IP
> ranges, ports or user accounts for the inbound/outbound rules of security groups,
> virtual firewalls established within AWS for EC2 and/or VPC instances, can be revealed
> by the `DescribeSecurityGroups` action with various request parameters. (Citation:
> DescribeSecurityGroups - Amazon Elastic Compute Cloud)

Atomic Tests

- Atomic Test #1 - Security Software Discovery

- Atomic Test #2 - Security Software Discovery - powershell

- Atomic Test #3 - Security Software Discovery - ps (macOS)

- Atomic Test #4 - Security Software Discovery - ps (Linux)

- Atomic Test #5 - Security Software Discovery - Sysmon Service

- Atomic Test #6 - Security Software Discovery - AV Discovery via WMI

Atomic Test #1 - Security Software Discovery

Methods to identify Security Software on an endpoint

when sucessfully executed, the test is going to display running processes, firewall
configuration on network profiles and specific security software.

atomic-red-team/atomics/T1518.001/T1518.001.md at f339e7da7d05f6057fdfcdd3742bfcf365fee2a9 · redcanaryco/atomic-red-team · GitHub - 02/11/2024 15:23 https://github.com/redcanaryco/atomic-red-team/blob/f339e7da7d05f6057fdfcdd3742bfcf365fee2a9/atomics/T1518.001/T1518.001.md#atomic-test-5---security-software-discovery---sysmon-service

Supported Platforms: Windows

auto_generated_guid: f92a380f-ced9-491f-b338-95a991418ce2

Attack Commands: Run with `command_prompt` !

```
netsh.exe advfirewall  show allprofiles
tasklist.exe
tasklist.exe | findstr /i virus
tasklist.exe | findstr /i cb
tasklist.exe | findstr /i defender
tasklist.exe | findstr /i cylance
```

Atomic Test #2 - Security Software Discovery - powershell

Methods to identify Security Software on an endpoint

when sucessfully executed, powershell is going to processes related AV products if they are running.

Supported Platforms: Windows

auto_generated_guid: 7f566051-f033-49fb-89de-b6bacab730f0

Attack Commands: Run with `powershell` !

```
get-process | ?{$_.Description -like "*virus*"}
get-process | ?{$_.Description -like "*carbonblack*"}
get-process | ?{$_.Description -like "*defender*"}
get-process | ?{$_.Description -like "*cylance*"}
```

Atomic Test #3 - Security Software Discovery - ps (macOS)

Methods to identify Security Software on an endpoint when sucessfully executed, command shell is going to display AV/Security software it is running.

Supported Platforms: macOS

auto_generated_guid: ba62ce11-e820-485f-9c17-6f3c857cd840

Attack Commands: Run with `sh` !

```
ps aux | egrep 'Little\ Snitch|CbOsxSensorService|falcond|nessusd|santad
```

Atomic Test #4 - Security Software Discovery - ps (Linux)

Methods to identify Security Software on an endpoint when sucessfully executed, command shell is going to display AV/Security software it is running.

Supported Platforms: Linux

```
ps aux | egrep 'falcond|nessusd|cbagentd|td-agent|packetbeat|filebeat|au
```

Atomic Test #5 - Security Software Discovery - Sysmon Service

Discovery of an installed Sysinternals Sysmon service using driver altitude (even if the name is changed).

when sucessfully executed, the test is going to display sysmon driver instance if it is installed.

Supported Platforms: Windows

auto_generated_guid: fe613cf3-8009-4446-9a0f-bc78a15b66c9

Attack Commands: Run with `command_prompt`! Elevation Required (e.g. root or admin)

```
fltmc.exe | findstr.exe 385201
```

Atomic Test #6 - Security Software Discovery - AV Discovery via WMI

Discovery of installed antivirus products via a WMI query.

when sucessfully executed, the test is going to display installed AV software.

Supported Platforms: Windows

auto_generated_guid: 1553252f-14ea-4d3b-8a08-d7a4211aa945

Attack Commands: Run with `command_prompt`! Elevation Required (e.g. root or admin)

```
wmic.exe /Namespace:\\root\SecurityCenter2 Path AntiVirusProduct Get dis
```
