## README

# HTran

HTran is a connection bouncer, a kind of proxy server. A "listener" program is hacked stealthily onto an unsuspecting host anywhere on the Internet. When it receives signals from the actual target system, it redirects it to the hacker's server. HTran have two platform version: Windows and Unix-like(Linux、Unix、etc...) HTran 's Windows version code by lion and bkbll. Ported to Linux/Unix by Hwin.

```
