List all installed programs, version & path [Windows]

TUTORIALS   By Sarcastic Writer   ·   October 8, 2017   ·   Comments off

WMIC is the console version of Windows Managament Instrumentation which is available from windows 2000 onwards.

By Typing **"wmic product get name"** will shows you a list of all application names which is installed on your machine.

```
Select C:\WINDOWS\system32\cmd.exe

C:\Users\cheta>wmic product get Name
Name
Microsoft Office Enterprise 2007
Microsoft Office OneNote MUI (English) 2007
Microsoft Save as PDF or XPS Add-in for 2007 Microsoft Office programs
Microsoft Office Groove Setup Metadata MUI (English) 2007
Microsoft Office InfoPath MUI (English) 2007
Microsoft Office Access MUI (English) 2007
Microsoft Office Shared Setup Metadata MUI (English) 2007
Microsoft Office Excel MUI (English) 2007
Microsoft Office Shared 64-bit Setup Metadata MUI (English) 2007
Microsoft Office Access Setup Metadata MUI (English) 2007
Microsoft Office PowerPoint MUI (English) 2007
Microsoft Office Publisher MUI (English) 2007
Microsoft Office Outlook MUI (English) 2007
Microsoft Office Office 64-bit Components 2007
Microsoft Office Shared 64-bit MUI (English) 2007
Microsoft Office Groove MUI (English) 2007
Microsoft Office Word MUI (English) 2007
Microsoft Office Proofing (English) 2007
Microsoft Office Shared MUI (English) 2007
Microsoft Office Proof (English) 2007
Microsoft Office Proof (Spanish) 2007
Microsoft Office Proof (French) 2007
Microsoft Office File Validation Add-In
Microsoft Visual C++ 2008 Redistributable - x64 9.0.30729.4148
Macromedia Dreamweaver 8
Microsoft Visual C++ 2010  x64 Redistributable - 10.0.40219
Microsoft Visual C++ 2005 Redistributable (x64)
Microsoft Visual C++ 2010  x86 Redistributable - 10.0.40219
Microsoft Visual C++ 2013 x86 Minimum Runtime - 12.0.21005
Microsoft Visual C++ 2013 x86 Additional Runtime - 12.0.21005
Microsoft Visual C++ 2015 x64 Minimum Runtime - 14.0.24215
Microsoft Visual C++ 2015 x86 Minimum Runtime - 14.0.24215
Microsoft Visual C++ 2013 x64 Minimum Runtime - 12.0.40649
Java 8 Update 144
Macromedia Extension Manager
Microsoft Visual C++ 2008 Redistributable - x64 9.0.30729.6161
Adobe Refresh Manager
Adobe Reader XI (11.0.22)
Microsoft Visual C++ 2008 Redistributable - x86 9.0.30729.6161
Microsoft Visual C++ 2008 Redistributable - x86 9.0.21022
```

Alternatively, you can even find all possible information in one command like "**wmic product get name, version, installlocation**"

```
Select C:\WINDOWS\system32\cmd.exe

Microsoft Windows [Version 10.0.15063]
(c) 2017 Microsoft Corporation. All rights reserved.

C:\Users\cheta>wmic product get name, version, installlocation
InstallLocation                              Name                                    Version
C:\Program Files (x86)\Microsoft Office\     Microsoft Office Enterprise 2007        12.0.6612.1000
```

To save all results in a text file, type "**wmic /output:D:\yeahhub.txt product get name, version**"

And to save all results in a HTML file (Tabular format), then the command is "**wmic /output:software.htm product get Name, Version /format:htable**"

file:///C:/Users/cheta/software.htm

Use "**wmic product get /?**" to see the parameters including the output formatting with all other attributes.

```
C:\Users\cheta>wmic product get /?
```

But sometimes WMIC won't work on server unless you have explicitly installed "*Management & Monitoring Tools*" in the Add/Remove Windows Component Menu

So for this case, you can find all the information through Registry, by typing "**regedit**" in your Run Command and navigate to below path.

> "*HKEY_LOCAL_MACHINE\SOFTWARE\Microsoft\Windows\CurrentVersion\Uninstall*"

If you want to know particular installed software from a particular vendor like Microsoft then you can type "**wmic product where "Vendor like '%Microsoft%'" get Name, Version**"
