Migrations

Migrations documentation

If you're moving to GitHub from another code hosting platform or moving between GitHub products, learn how to use our migration tooling to bring your work with you.

Overview   Plan your migration

Start here

About GitHub Importer

If your source code is stored on another Git-based hosting service, you can move the code to GitHub.com using GitHub Importer.

About GitHub Enterprise Importer

With GitHub Enterprise Importer, you can migrate your enterprise to GitHub Enterprise Cloud from various sources.

Automating migration with GitHub Actions Importer

Use GitHub Actions Importer to plan and automate your migration to GitHub Actions.

Popular

Importing a repository with GitHub Importer

If you have a project hosted on another Git-based hosting service, you can quickly import it to GitHub using the GitHub Importer tool.

Adding locally hosted code to GitHub

If your code is stored locally on your computer and is tracked by Git or not tracked by any version control system (VCS), you can import the code to GitHub using GitHub CLI or Git commands.

Migrating repositories from GitHub Enterprise Server to GitHub Enterprise Cloud

You can migrate repositories from GitHub Enterprise Server to GitHub Enterprise Cloud, using the GitHub CLI or API.

Guides 🔗

Reclaiming mannequins for GitHub Enterprise Importer

After your migration, you can assign the history of a placeholder identity, or mannequin, to a member of your organization.

Troubleshooting your migration with GitHub Enterprise Importer

If your migration fails or produces unexpected results, you can try common troubleshooting steps.
