Templates are the core of the nuclei scanner which powers the actual scanning engine. This repository stores and houses various templates for the scanner provided by our team, as well as contributed by the community. We hope that you also contribute by sending templates via **pull requests** or Github issues to grow the list.

Nuclei Templates overview

An overview of the nuclei template project, including statistics on unique tags, author, directory, severity, and type of templates. The table below contains the top ten statistics for each matrix; an expanded version of this is available here, and also available in JSON format for integration.

Nuclei Templates Top 10 statistics

TAG	COUNT	AUTHOR	COUNT	DII
cve	2773	dhiyaneshdk	1420	htt

panel	1212	daffainfo	866	file
wordpress	1046	dwisiswant0	802	clo
exposure	997	princechaddha	498	wc
xss	956	ritikchaddha	455	net
wp-plugin	915	pussycat0x	452	coc
osint	807	pikpikcu	353	jav
tech	729	pdteam	302	ssl
lfi	713	ricardomaia	243	da:
misconfig	713	geeknik	231	dn:

723 directories, 9654 files.

📖 Documentation

Please navigate to https://nuclei.projectdiscovery.io for detailed documentation to **build** new or your own **custom** templates. We have also added a set of templates to help you understand how things work.

💪 Contributions

Nuclei-templates is powered by major contributions from the community. Template contributions , Feature Requests and Bug Reports are more than welcome.
