# Intranet Sites: Include all network paths (UNCs)

This policy setting controls whether URLs representing UNCs are mapped into the local Intranet security zone.

If you enable this policy setting, all network paths are mapped into the Intranet Zone.

If you disable this policy setting, network paths are not necessarily mapped into the Intranet Zone (other rules might map one there).

If you do not configure this policy setting, users choose whether network paths are mapped into the Intranet Zone.

> **Supported on:** At least Internet Explorer 6.0 in Windows XP with Service Pack 2 or Windows Server 2003 with Service Pack 1
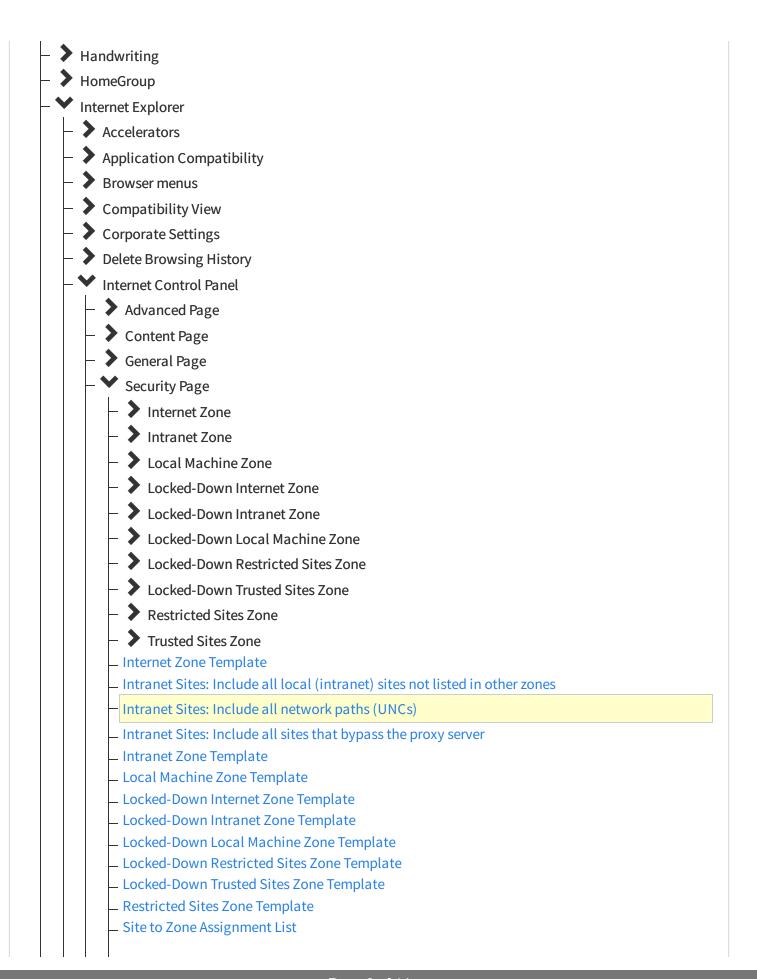

| Registry Hive | HKEY_LOCAL_MACHINE or HKEY_CURRENT_USER |
|---|---|
| Registry Path | Software\Policies\Microsoft\Windows\CurrentVersion\Internet Settings\ZoneMap |
| Value Name | UNCAsIntranet |
| Value Type | REG_DWORD |
| Enabled Value | 1 |
| Disabled Value | 0 |
