⇐ **Windows Security Log Event ID 4800** ⇒

4800: The workstation was locked

On this page

- Description of this event
- Field level details
- Examples

When either a user manually locks his workstation or the workstation automatically locks its console after a period of inactivity this event is logged.

To find out when the user returned and unlocked the workstation look for event ID 4801.

If a screen saver is used, there is a relationship between this event and 4802/4803 See event ID 4802 for an explanation of the sequence of events.

Operating Systems	Windows 2008 R2 and 7 Windows 2012 R2 and 8.1 Windows 2016 and 10 Windows Server 2019 and 2022
Category • Subcategory	Logon/Logoff • Other Logon/Logoff Events
Type	Success
Corresponding events in Windows 2003 and before

Description Fields in 4800

Subject:

The user and logon session involved.

- Security ID: The SID of the account.
- Account Name: The account logon name.
- Account Domain: The domain or - in the case of local accounts - computer name.
- Logon ID is a semi-unique (unique between reboots) number that identifies the logon session. Logon ID allows you to correlate backwards to the logon event (4624) as well as with other events logged during the same logon session.
