What are Ammyy Admin advantages?

Ammyy Admin is a reliable, trustworthy and affordable software for remote assistance, administration, **remote desktop** sharing and distance education from any place in the World.

Ammyy Admin doesn't require installation or specific settings adjustments. The **remote desktop** is available for work within a few seconds after Ammyy Admin has been started.

The key advantages of Ammyy Admin are: ease of use, a high standard of data transfer security, multitude of features, and affordability for a broad range of personal and corporate users.

Ammyy Admin is _free_ for non-commercial use!

✅ Remote desktop works without installation

Ammyy Admin is ready to use within a few seconds after downloading. Just send the link to the download page to your partner, set the ID (generated automatically) of the PC you're going to control remotely and begin **remote desktop** sharing. You can also use privacy and remote connection access verification settings.

✅ Remote server control

You can use Ammyy Admin for remote PC and server control without human presence on the client side. Ammyy Admin makes it easy to control by **remote the desktop** of unattended computers. This enables you to restart, log-in/ out, change users and more using Ammyy Admin Service for **remote desktop sharing.**

✅ Fast performance

No matter what kind of Internet connection you have, dial-up or LAN at any speed, Ammyy Admin provides optimum display performance using internal traffic optimization algorithm. You can manually set the balance between picture quality or data transfer rate.

✅ High standard of data transfer security

All communications with **remote desktop**, including display images, cursor, keyboard, and files transferred between local and remote computers are encrypted by high standard security algorithm AES and RSA which use different keys for each session. The encryption mode is always on. Ammyy Admin doesn't open remote or local PC ports. It provides sophisticated **remote access** rights management using unique hardware ID and/or password.

✅ Voice chat

You can use a headset for communication with your partners who are at **remote desktop** using Ammyy Admin voice chat feature. This feature is also widely used for holding on-line conferences, presentations and virtual classes.

✅ Transparent for Firewalls and User Friendly

Ammyy Admin is transparent for Firewalls, you don't have to make additional adjustments on the Firewall or VPN connection settings, exposing local PCs or remote computer networks to the risk of security bug. You can easily access **remote desktops** of computers behind gateways NAT without port mapping. Ammyy Admin has a very user-friendly interface. It's simple to use and can be managed by both professional and inexperienced PC users.

✅ File manager

Ammyy Admin provides the file manager feature so you can copy files and folders between local and remote computer desktops up to 140 Tb in size with the ability to resume interrupted downloads without information loss. The range of operations with files and folders on the remote computer includes create, delete, move, rename, and more.

✅ Support HTTPs proxy (100% secure connection)

✅ Full Microsoft Windows compatibility

Ammyy Admin is entirely compatible with:

- Windows 2000/XP/Vista/7/8
- Windows Server 2000/2003/2008
- 32-bit and 64-bit

✅ Vast number of features at competitive price

Ammyy offers you this multi-task software at a very competitive price. Enhance your business by reducing costs and increasing quality control. You can be assured that you're getting one of the best solutions for **Remote Desktop** with Ammyy Admin.
